COVER LETTER

Dear Recruiter,

I am writing to express my interest in joining your team as a Senior Mobile Engineer. I have over 5 years of experience developing scalable applications for iOS and Android with React Native, as well as 3 years working with Flutter and web technologies (React/Next.js), which has given me a solid foundation in mobile and cross-platform development.

My background includes strong expertise in software architecture, Clean Code, automated testing, and CI/CD pipelines. I have contributed to ERP projects for Telecom, marketplaces, and delivery platforms, always prioritizing performance, maintainability, and user experience. I also have experience with DevOps tools for build and release automation, ensuring efficient and reliable deliveries.

As a person with a disability (PCD), I value inclusive environments and believe that diversity strengthens teams and drives innovation. I am open to discussing any necessary workplace accommodations. Additionally, I have a recommendation letter from my last employer, available upon request.

I am passionate about technology and continuous improvement, and I am motivated to contribute my skills and experience to your company. I am confident that my technical background and proactive attitude will add value to your team.

Thank you for considering my application. I am available for an interview and look forward to discussing how I can contribute to your projects.

Sincerely,

Jhonny Limberger Dinarte
